

Commercial Application for New Water Service

Business Name: _____

Contact's Name: _____

Business or Applicant's Address: _____

Telephone No: _____

Cell Phone No.: _____

Fax No: _____

Email Address: _____

Legal description of property where service is to be located: _____

(Complete Appropriate Section Below)

Commercial Development

Number of Employees: _____

Animals (type & number): _____

Minimum Pressure Requirements: _____ psi

Maximum Flow Requirements: _____ gpm

Total Hours per day that average flow will be required: _____ hours

Will earth moving be extensive in the development of your project. Yes No

Date when Service is required: _____

Application Fee:

Hydraulic Analysis Necessary Yes No Fee: \$750.00

(To be determined by SIRWA)

General Information about SIRWA's Water Distribution System:

- SIRWA's rural water system is not designed to provide fire protection
- SIRWA's rural water system is designed to provide a minimum of 20 psi pressure during periods of high demand throughout the individual pressure zones. The pressure at your meter may be greater than 20 psi. The pressures currently experienced in the system may fluctuate over time.
- All new distribution system piping shall be SDR PVC.
- 2" diameter flushing (blowoff) hydrants shall be installed at the end of all dead end mains.

By signing this application, I am authorizing SIRWA to complete a hydraulic study of the pressure zone which will serve the area I am requesting service for. I realize this is a non-refundable fee & SIRWA may not have sufficient infrastructure to provide service to my proposed meter.
