****SIRWA may restrict the gallon per minute of flow to customers requiring over 10,000 gallons in any given month. It is recommended that customers requiring over 10,000 gallons in a month provide adequate amounts of onsite storage. All customers are subject to SIRWA's Rules & Regulations. Please visit www.sirwa.org for details or a copy may be mailed upon request.*

By signing this application, I am stating that I have provided SIRWA with a complete and accurate picture of what my water usage needs are in order for the required DNR hydraulic study to be completed accurately

Signature of Applicant: _____ Date: _____

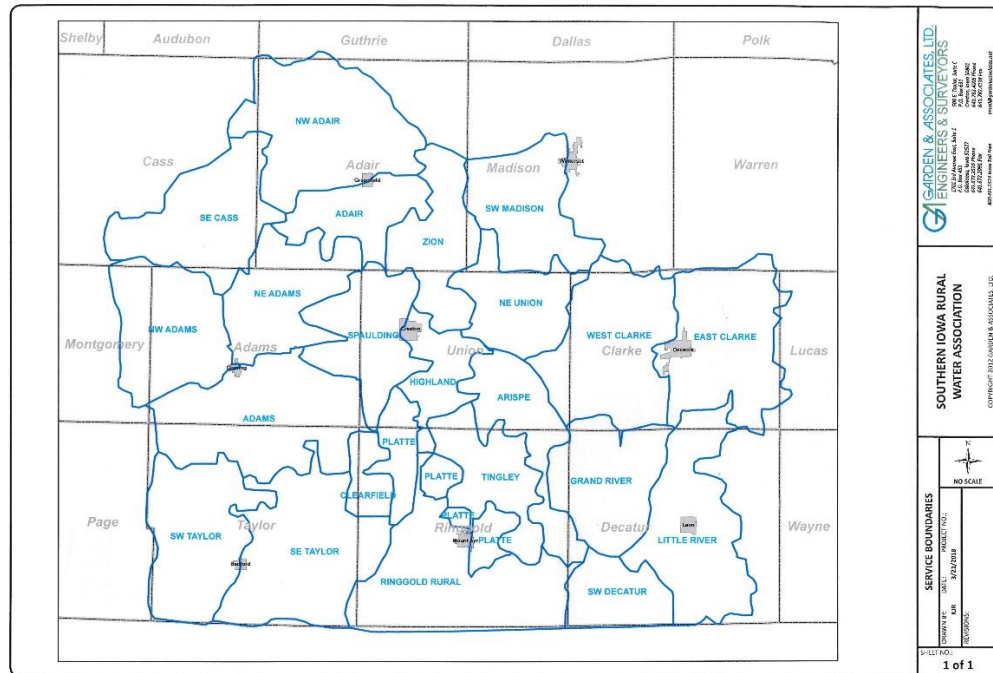

We require the information listed below in order to provide an accurate estimate.

Any information NOT provided will delay your water estimate.

- Enclose a copy of the recorded deed (include survey of parcel if available)
- Enclose a check or money order for \$100.00 which will be applied towards the cost of the water service installation.
- **Deposit is nontransferable/nonrefundable**

Hooking up to SIRWA

- Complete Application for a water meter service and submit to SIRWA along with application fee.
- We will then submit your application to SIRWA's engineer in order to determine which service line will provide optimum connection and to assure that we have the capacity available to service your water needs.
- We will then prepare and send out your estimate along with all necessary paperwork to install the metered service. (Meter pit must be set by a driveway)
 - *Factors Affecting cost:*
 - Distance from the existing service line to the meter pit location
 - Cost of materials at the time of request
- Once you complete and return ALL required paperwork to SIRWA, along with the final payment, we will submit your application to the DNR for review and approval which can take 6-8 weeks.
- Once DNR approved is received, you will be added to the installation list for the contractor. Services are installed in the order in which the paperwork and payment were received.
